## **NIAN DICEWORKS**

Nian Diceworks began manufacturing metal dice in 2014. Our dice are created using heavy zinc alloy. We operate three cooperative plating factories with independent mold development and our own casting line with a high quality control team. Additionally, we employ professional designers and have an experienced sales team to ensure both a high quality product and an excellent customer experience.

We added two injection molding machines last year for the creation of polymer dice, specializing in sharp edge acrylic dice.

We are open to helping you customise or create dice in any color to make your unique project a reality!

# Metal Dice

- Classic Metal Dice Sets

Classic metal dice were our earliest dice, using many different plating styles. These include gold, silver, and copper in shiny, antique, and satin styles. We also offer dark chrome and silver. Any of these plating styles can be combined with any color of painted numbers or a custom logo of your choosing.

Anitque Silver

Dark Chrome Red

Dark Nickel Red

Shiny Copper Black

- Innovative Metal Dice Sets

This innovative design was launched in November of 2019, and features a distinctive border that can be custom colored to contrast well with any of our plating methods!

• Energetic Metal Dice

Energetic Metal Dice are our second-generation mold which we developed and have applied appearance patents for. Based on our unique abrasive tooling, we offer more options for both plating and inlay color. This includes transparent glass paint, enamel and baking paint. We can combine two or three colors to create stunning effects.

## • Rigid Metal Dice

Rigid Metal Dice are stunning. You'll enjoy bringing them to your local Dungeons & Dragons game. They look larger than classic molds, but don't worry - they're scaled to match a standard 16mm plastic set.

## • Ancient Metal Dice

You want a classic mold, but are looking for something special? Take a look at our ancient metal dice! They use a prominent, specialized font which shows their premier quality. Most sets utilize sunken numbering, but our newest design flips the script, using protruding numbers, which you'll love! This is our newest mold.

# Polymer RPG Dice

- Acrylic RPG Dice by Color

Want to produce some unique swirl, glitter, or acrylic dice? We can help! Any color you want, just let us know. We have an independent color department to help you test new colors for polymer dice.

Two-tone Swirl Sky Blue /White

# 20 Sided Dice

When you're playing D&D, everyone hates rolling 1's and thrills when they see a 20 hit the table. The d20 is the most important die in Dungeons & Dragons and many other role-playing games. Want to get a special d20 to shine for your game? No matter if it's giant, mini, or hollow, we can make it!

## D6 Dice

Whether you're looking for the standard six sided die with pips or numbers, we can make them for you! For special designs or a logo, we can even help create custom faces. This option is available for both metal and acrylic dice. Custom acrylic dice are especially suitable for children playing education-related games.
